"Study to make yourself loved" - Don Bosco

About Me

Hello and welcome to my website! My name is George Youssef, and I'm originally from Alexandria, Egypt. I have a diverse background that spans across hardware engineering, computer teaching, and now web development.

Skills

Full stack developer (Backend and Frontend), Java Developer, Web Developer, Java, Python, C#, IntelliJ, Visual Studio Code, NoSQL, SQL, DBeaver, JSON, MongoDB, HTML5 & CSS3, JavaScript and Web communication, Node.js, React, TypeScript, Framework in JavaScript, Java Enterprise and Eclipse, Agile Project Methodology, IT and information security, Cloud services, Test-driven development, Web services in Java, Umbraco and more ...

Languages

Swedish, excellent in reading, writing and good in talking.

English, excellent in reading, writing and talking.

Italian, excellent in reading, writing and talking.

Egyptian-Arabic, native language.

Education and Early Career

2024	Full-Stack Developer, STI, Stockholm.
2010	Master's degree in theology, Salesian Pontifical University (UPS), Rome.
2000	Bachelor's Degree in Management and Computer Science, Alexandria University.

I earned my university degree from Alexandria University in Management and Computer Science Engineering back in 2000. During my studies, I worked as a hardware engineer, gaining valuable hands-on experience in the field. After completing my degree, I transitioned into teaching at a technical institute

called "Don Bosco Technical Institute" in Lebanon. In this role, I managed the computer laboratory, handled maintenance tasks, and set up networks. I taught a variety of subjects including computer basics, MS Office applications, and graphic design.

Journey to Sweden

In 2014, I moved to Sweden, where I embarked on a new professional journey. I took on different challenges and roles, always striving to expand my skills and knowledge.

Focus on Web Development

In 2023, I decided to refocus my career and returned to my passion for IT by studying programming and web development. I studied in Stockholm Technical Institute (STI) as a Full-Stack Developer, where I immersed myself in modern web technologies and practices.

My Mission

My mission is to leverage my diverse background and newly acquired skills in web development to create meaningful and user-friendly digital experiences. I am enthusiastic about crafting elegant solutions to complex problems and staying updated with the latest trends in technology.

Get in Touch

Thank you for visiting my website and taking the time to learn about my journey. If you have any questions, collaboration opportunities, or just want to say hello, feel free to contact me!

Let's build something awesome together!
